ABOUT US

At Zitron Limited, we are dedicated to transforming the energy industry with sustainable solutions that prioritize both environmental responsibility and performance. Founded in 2018, our company specializes in producing 100% natural and eco-friendly charcoal briquettes made from premium Palm Kernel Shells (PKS). These high-efficiency briquettes offer a clean and renewable alternative to traditional fossil fuels, supporting the global shift toward green energy. Our commitment lies in delivering products that not only meet the growing energy needs of homes and businesses but also help preserve the planet for future generations. With a minimum order capacity of 25 tons and the capability to fulfill up to 10,000 tons, we cater to both small and large-scale demands.
